PROFILE

I am Muhammad Ahmad Raza, 5th Semester student at SEECS, NUST. I did the Udemy 60-hour bootcamp in my first summer. I know the foundations. Just need some practice to polish my skills in web development. I see this a great opportunity to work in an organization and learn how real world projects are dealt with.

EXPERIENCE

Udemy Web Development Bootcamp 2024

- I have learned web development in my first summer from Udemy. I watched Angela Yu's Web Development Bootcamp. So, basically, I know the fundamentals and the theory part of this field. I just want hands-on experience to get myself comfortable with this filed.

Web Engineering Course 2025

- I have my web engineering course this semester, so I am learning the content right now and just wanted that knowledge to implement that in real world. This internship can help me get to know the practical side of this course.

Projects 2024 - 2025

- Completed some projects from basic to medium level. But now wanted to complete advance real world projects with variable difficulty.

EDUCATION

Bachelor of Engineering in Software Engineering 2023 - 2027

School of Electrical Engineering and Computer Science (SEECS) | NUST University
